GAO noted that: (1) schools prepared for 21st century education should have adequate space for instruction and storage, facilities for teaching laboratory science, and a library with multiple, networked computers for instructional use; (2) new schools are being built with these changes in mind, yet only a handful of such schools model state-of-the-art technology; (3) at least three quarters of the public schools surveyed reported having sufficient computers and televisions, although they do not have the building infrastructure to fully use them; and (4) not all students have equal access to facilities that support state-of-the-art technologies and many education reformers find it unfair to hold students to nationwide standards if they do not have an equal opportunity to learn. This item ships from La Vergne, TN. Paperback.
